

## Diamond Industrial Sprockets

 **DIAMOND**

## Demand Quality..... Demand Diamond

Perfect chain-sprocket interaction is critical for a smooth & trouble free operation of your system. Make a right choice with sprockets from TIDC India.

We can provide not only the best chains for your application, but sprockets too, which are designed and manufactured to high quality standards to maximize over all system performance. A perfect chain & sprocket articulation will get you a longer service life. This means

- ▶ Reduced down time
- ▶ Reduced maintenance costs
- ▶ Increased Productivity

## The Cutting Edge

Material Selection – Diamond Sprockets are made of special steel to offer longer wear life and to withstand impact loads

Precision Manufacturing- Diamond sprockets are made through gear hobbing process and meet the design specifications and highest quality standards.

## Sprocket Range

Diamond Sprockets are available across wide pitch groups and tooth counts  
The sprockets comply with British Standards and with Pilot bore.

Pitch : 3/8" to 1 1/2"

Tooth : 9 to 76

Strand : Simplex
